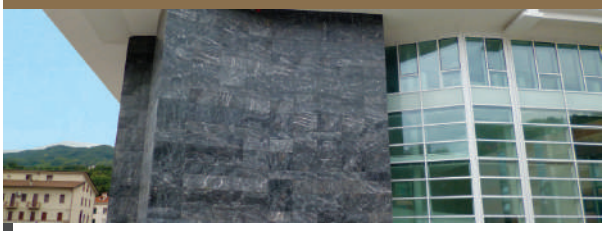
STONEPLUS

WATER- AND OIL-REPELLENT PROTECTIVE AGENT WITH REVIVING EFFECT

STONE AND AGGLOMERATES, MARBLE, GRANITE

STONEPLUS penetrates deeply into the material and protects it extensively from watery or oily stains and dirt. It also revives grout lines, does not yellow and withstands UV radiation.



WHAT IT'S FOR

- Protects and revives the original colour of polished, untreated and tumbled natural stone.
- Deeply penetrates the material and protects it from watery or oily stains and dirt.
- Ideal for all stone applications, worktops, rosettes and any decorative stone objects.
- Excellent for use indoors and outdoors.

ADVANTAGES

- Produces a reviving effect on all finishes.
- For indoor and outdoor use.
- Does not yellow, resists UV radiation, and it provides enduring protection.
- Extremely high coverage.
- It also eliminates granite minute excoriations.
- Does not form surface film
- Treated surfaces are safe for food contact
- An **A+** classified product in accordance with the French VOC regulation

COVERAGE

With one litre:	
Polished stone	30/50m²
Unpolished stone	15/25m²

"Coverage shown is for guidance purposes only and refers to single coats"

Packaging

375 ml: boxes of 12.
1 litre: boxes of 6.
5 litres: boxes of 4.

HOW TO USE IT

No dilution required: ready to use.

Application: Apply **STONEPLUS** on dry and clean material using a brush or other appropriate tool. During application, rub the surface with a cloth to aid the product's penetration and remove any excess product completely. The surface can be walked on after 8 hours. To improve colour revival, apply several coats of the product with an interval of at least 8 hours in between.
Maintenance: diluted solution of **CLEANER PRO**.

FOR PROFESSIONAL USE ONLY: spray the product (airless system) on vertical surfaces until they are saturated and use appropriate PPE, as specified in the safety information sheet.

WARNINGS
- Keep out of reach of children.
- Do not disperse into the environment after use.
- The use of a single-disc cleaning machine is permitted only if it is perfectly undamaged.

TEMPERATURES
Storage temperature: from 0°C to 30°C
The product should be applied to materials with temperature between 5° and 30°C.

Caution:
*Once treated with **STONEPLUS**, the stone cannot be restored to its original condition. Before treating the surface, carry out a spot test to check the final colour. On certain materials laid outdoors, it is advisable to repeat the treatment every year to optimally preserve the reviving effect.*
Does not protect against acid aggression.
Do not apply the product if rain is expected.
