

COLOUR INTENSIFIER SEALER

UNPOLISHED NATURAL STONE AND TERRACOTTA

INDOOR USE

OUTDOOR USE

- Resists weathering.
- Does not yellow.
- Resistant to heavy wear
- Makes cleaning easier.
- Water-based technology and plant-based formula.
- Interior and exterior use.

WHAT IT'S FOR:

- Penetrates and protects from water and oil-based stains and dirt.
- Prevents the absorption of stains.
- Wet look sealer that enhances and revives the colour of the surface.

HOW TO USE IT:

The product is ready to use, no dilution needed.

To seal and enhance surfaces: shake well before use. On a clean, dry surface apply **COLOUR INTENSIFIER SEALER** evenly using a brush or microfibre applicator. Leave to allow the product to penetrate the material and grout. A second coat will be required for more absorbent materials and to achieve a more enhanced effect, and should be applied 2-3 hours after the first coat as directed above. The surface may be used after 12 hours and the stain protection is active after 24 hours.

PACKAGING	PIECES PER CARTON	APPROXIMATE COVERAGE (1 LITRE):
1L	12 pz	Unpolished stone: 10-20 m ²
		Terracotta 7-20 m ²

STORAGE TEMPERATURE:

Between 5°C and 30°C.

Must be applied at temperatures between 10°C and 30°C.

Caution:

Do not apply on polished surfaces. Do not apply the product outdoors in wet weather. The product may not be applied on substrates with rising damp. In order to be treated, outdoor flooring must be frost resistant and should be installed correctly, according to site requirements, including the correct slope, movement joints, and the insulation of the terrain.
