

## CONCENTRATED STAIN REMOVER AND SURFACE PREPARER

STONE AND AGGLOMERATES, PORCELAIN TILES, CEMENT AGGLOMERATES, CONCRETE, TERRACOTTA, EXPOSED BRICKS, QUARRY TILES

### WHAT IT'S FOR

- It prepares surfaces for the protective treatment by degreasing and removing the most stubborn dirt
- It removes any excess non-film-forming waterproofing sealers, also in the event of incorrect application
- A preparatory product recommended for surface preparation prior to treatment with SALVATERRAZZA® and SALVATERRAZZA® ECO.

### ADVANTAGES

- Contains biodegradable ingredients
- High performance
- Guaranteed results
- Fast action
- Vigorous cleaning action
- VOC-free
- It improves the absorption of SALVATERRAZZA® and SALVATERRAZZA® ECO

is a detergent remover formulated for preparing natural stone, porcelain stoneware, concrete, terracotta and quarry tile surfaces for treatment with SALVATERRAZZA®. Thoroughly degreases and eliminates the most stubborn dirt. In case of incorrect application, it is effective in removing excess SALVATERRAZZA® and residues of non-film-forming water- and oil-repellent treatments.

### COVERAGE

With one litre:

Undiluted	up to 10 m <sup>2</sup>
Diluted	up to 30 m <sup>2</sup>

Coverage rates are indicative.

### Packaging

5 litres: boxes of 4.

### WARNINGS

- Keep out of reach of children.
- Do not disperse into the environment after use.

### TEMPERATURES

Storage temperature: from 5° to 30° C.  
The product should be applied to materials with temperature between 5° and 30° C.

### HOW TO USE IT

**Dilution:** According to use.

**Application instructions:**

**For preparing heavily soiled surfaces, prior to the application of protective treatments such as non-film-forming oil and water repellents:** first, wet the surface with water. Then, dilute the product 1:5, apply the mixture on the surface and leave to react for 2–3 minutes.

Rub with a floor scrubbing brush, single-disc machine or abrasive sponge. Remove residues of the solution using a liquid vacuum cleaner or cloth and rinse thoroughly with water.

For deeper cleaning, dilute the product 1:3.

Apply the chosen protective treatment on a clean and dry surface.

**FASEZERO** is a preparatory product recommended for surface preparation prior to treatment with SALVATERRAZZA® and SALVATERRAZZA® ECO.

In the event of incorrect application of non-film-forming water and oil repellent treatments, or to remove any excess SALVATERRAZZA® and SALVATERRAZZA® ECO: apply the undiluted product directly onto the surface using a paintbrush. Leave to react for 15 minutes, rub with a brush or single-disc machine and rinse well with water.

Repeat the application in the event of stubborn treatments.

### Caution:

*Do not use on new polished marble and stone or on wood. Avoid contact with metal surfaces (rinse them thoroughly if this happens). Always perform a preliminary trial on a small area of the surface. On bricks and terracotta surfaces, we suggest performing a neutralising wash with DETERDEK PRO after applying FASEZERO.*
