

FUGANET

SPECIFIC CLEANING FOR GROUTING

ALL TYPES OF GROUTING

- Contains biodegradable ingredients
- Extremely practical, easy-to-use packaging with ergonomic grip and spray applicator
- Does not damage or corrode wall tiles
- Does not contain acids or sodium hypochlorite

WHAT IT'S FOR

- Thoroughly cleans grouts in ceramic tile floors and walls. Suitable for single-fired and double-fired porcelain tiles. Unsuitable only for porous surfaces treated with wax

HOW TO USE IT

No dilution required: ready to use.

Application: Spray **FUGANET** directly onto the grouting. Leave for a few minutes then scrub with an abrasive sponge or flat brush. Rinse after cleaning. If the grouting is very dirty, we recommend cleaning it thoroughly first with **DETERDEK PRO** diluted 1:10.

PACKAGING

750 ml bottles with spray nozzle in boxes of 6.

COVERAGE (750 ML):

up to 850 linear metres

Coverage rates are indicative.

WARNINGS

- Keep out of reach of children.
- Do not disperse into the environment after use.

TEMPERATURES

Storage temperature: Between 5°C and 30°C.
The product should be applied to materials with temperature between 5° and 30°C.

Caution:

This product makes methacrylate surfaces dull, use with care near methacrylate baths and basins.
