

## STRONG ACID DE-SCALER

TERRACOTTA, QUARRY TILES, PORCELAIN TILES

**PHZERO** is a strong acid descaler, specially formulated for removing building-site dirt (laying residues and possible saline efflorescences) from surfaces resistant to acids (stoneware, quarry tiles, terracotta, etc.) and for all cases in which normal descaling is insufficient due to the intense building-site dirt.

### DILUTIONS AND COVERING

With one litre:

Terracotta 1:5	20 m <sup>2</sup>
Porcelain tiles 1:5	40 m <sup>2</sup>

“Coverage shown is for guidance purposes only and refers to single coats”

#### Packaging

- 1 litre: boxes of 12.
- 5 litres: boxes of 4.

#### WARNINGS

- Keep out of reach of children.
- Do not disperse into the environment after use.

#### TEMPERATURES

Storage temperature: from 5° to 30° C.  
The product should be applied to materials with temperature between 5° and 30° C.

### WHAT IT'S FOR

- Removes dirt and building-site residues.
- Eliminates any saline efflorescences.
- Cleanses and removes deposits.
- It is essential for terracotta when other normal buffered acids for deposit removing are not effective.

### ADVANTAGES

- Biodegradable
- Buffered acid, does not produce harmful fumes for the user and the environment: it does not contain hydrochloric acid.
- It has longer working time than pure acids which have an instant reaction and limited performance time.
- It's ideal for applying on vertical surfaces due to its viscosity.
- It removes deposits and cleans at the same time because it also contains surfactants.

### HOW TO USE IT

**Dilution:** between 1:5 and 1:10 according to the level of dirt to be removed.

#### Application:

**For residues from laying floors:** on porous materials such as terracotta and stone, wet the surface well with water before washing. Depending on the extent of the deposits to be removed, dilute 1 litre of **PHZERO** in 5 or 10 litres of water. Spread the solution thus obtained over the surface, leaving it to take effect for 4–5 minutes. Next, use a floor brush or single-disc machine, collecting all residues with a cloth or liquid vacuum cleaner. Rinse with plenty of water.

**For walls and vertical surfaces:** before washing, we recommend wetting the surface thoroughly with water. Use a brush to apply the product undiluted. Leave the product to take effect for 4–5 minutes then rub with a suitable tool and rinse well, preferably using a water jet cleaner.

#### Caution:

**PHZERO** is a highly concentrated product, please only use when the level of dirt requires it.

Do not use **PHZERO** on marble and in general on materials that are sensitive to acids. Before applying the product, we recommend testing its reaction on a small area of the surface.
