

# PORCELAIN CEMENT RESIDUE REMOVER

PORCELAIN, CERAMIC, TERRACOTTA, QUARRY TILE AND ACID RESISTANT STONE

- Does not damage grout or aluminium and steel trims.
- Preserves the original finish of the material.
- Innovative and ecological phosphate-free formula without added scents.
- Water-based technology.
- Contains biodegradable ingredients

## WHAT IT'S FOR:

- Removes cement grout haze when the grout is fully cured.
- Eliminates building residue without damaging grout.
- Dissolves limescale and soap residue from walls, floors and bathroom taps.
- Ideal for removing small superficial rust stains.
- Removes limescale on outdoor surfaces.
- Interior and exterior use.

## HOW TO USE IT:

**To remove cement grout residue:** dilute the product 1:5 with clean water; 1L of **PORCELAIN CEMENT RESIDUE REMOVER** with 5L of water. Wet the surface with water, then apply the solution 2-3 m<sup>2</sup> at a time. Leave to react for a few minutes and scrub the surface using a suitable pad or brush. Remove any residue with a clean cloth and rinse well with water. To dissolve limescale and soap residue, dilute 1:10. To remove rust stains, use the product undiluted.

PACKAGING	PIECES PER CARTON	APPROXIMATE COVERAGE (1 LITRE):
		Terracotta 1:5: 20 m <sup>2</sup>
1L	12 pz	Porcelain tile 1:5: 30 m <sup>2</sup>
		Acid resistant natural stone 1:5: 20 m <sup>2</sup>

### STORAGE TEMPERATURE:

Between 5°C and 30°C.

Must be applied at temperatures between 5°C and 30°C.

### Caution:

Do not use the product on acid sensitive materials such as polished marble or limestone. Test the product on a small, inconspicuous area of the surface to check the material's resistance to the product.
