

# STONE CEMENT RESIDUE REMOVER

ALL NATURAL STONE AND TERRAZZO

- Does not damage grout or delicate materials.
- Interior and exterior use.
- Contains biodegradable ingredients.
- Water-based technology.

## WHAT IT'S FOR:

- Removes cement grout residue from stone surfaces.
- Delicately removes building residue.
- Removes cement grout residue and construction dirt.

## HOW TO USE IT:

**To remove cement grout residue:** dilute the product 1:20 with clean water; approximately 250 mL of **STONE CEMENT RESIDUE REMOVER** with 5L of water. Apply the solution across the surface 2-3 m<sup>2</sup> at a time. Leave to react for a few minutes then scrub well using a suitable pad or brush. Remove residue using a clean cloth and rinse well with water.

For very dirty surfaces, clean again following the above directions.

PACKAGING	PIECES PER CARTON	APPROXIMATE COVERAGE (1 LITRE):
1L	12 pz	Dilution 1:20: 30 m <sup>2</sup>

### STORAGE TEMPERATURE:

Between 5°C and 30°C.

Must be applied at temperatures between 5°C and 30°C.
