

CLEANER PRO

PROFESSIONAL MAINTENANCE FOR SURFACES

5 litres

1 litre

Highly concentrated cleaner for all surfaces, even the most delicate. Specially formulated for ordinary maintenance, it can be used for end-of-work washing when acid cleaners cannot be used.

CHARACTERISTICS AND ADVANTAGES

- Neutral cleaner
- Does not leave residues or streaks
- For manual cleaning or professional cleaning machines
- Does not damage metal trims or accessories
- Does not damage protective treatments
- Free of ammonia, sodium hydroxide, EDTA, phosphates
- Compatible with the HACCP protocols
- Contains ingredients that are biodegradable up to 98%

MATERIALS

PORCELAIN AND CERAMIC TILES, CONCRETE, WOOD, MARBLE, GRANITE AND NATURAL STONE, PLASTIC LAMINATES AND LVT, LINOLEUM, RUBBER AND PVC, TERRACOTTA AND QUARRY TILES

FIELDS OF APPLICATION

- Concentrated, for after-laying and end-of-work washing of delicate materials such as marble, natural stone and agglomerates, even with polished finish.
- Diluted, for ordinary manual maintenance with a microfibre mop.
- Diluted, for ordinary machine-based maintenance with a scrubber dryer or similar equipment.
- Suitable for cleaning in conformity to the UNI 11493-1:2016 standards for ceramic laying and maintenance and to the UNI 11714-1:2018 standards for stone material laying and maintenance.

INSTRUCTIONS

HOW TO USE IT

Dilution: from 1:30 to 1:200 depending on requirements.

Application:

For regular cleaning and maintenance of all surfaces:

Dilute **CLEANER PRO** at 1:200 (25 ml in 5 litres of water). No need to rinse. For more stubborn dirt, wash using more concentrated solutions.

For washing after laying of delicate surfaces (marble, travertine, granite, polished agglomerates etc.):

Dilute **CLEANER PRO** at 1:30 and wipe over the floor with a soft single-disc machine or scrubbing brush. Remove any residues using a liquid vacuum cleaner or cloth. Rinse after cleaning.

For scrubber-dryer machines:

Dilute **CLEANER PRO** at 1:200. Pour the solution into the tank.

For heavy-duty cleaning and maintenance of heavily soiled surfaces: dilute **CLEANER PRO** from 1:30 to 1:50 depending on dirt intensity. Wash using a cloth or large brush. Remove the dirt and rinse.

WARNINGS

Do not use **CLEANER PRO** on fabric floors.

TECHNICAL SPECIFICATION

Concentrated neutral cleaner (pH 7.2, 10% solution in water; density: 1.005 kg/l), contains less than 5% anionic surfactants and less than 15% non-ionic surfactants, contains ingredients that are biodegradable up to 98%. Free of ammonia, sodium hydroxide, EDTA, phosphates. Suitable for cleaning in conformity to the **UNI 11493-1:2016** standards for ceramic laying and maintenance and to the **UNI 11714-1:2018** standards for stone material laying and maintenance. For use on horizontal surfaces, both indoors and outdoors.

For use on all types of surfaces. Does not leave residues. Compatible with the **HACCP** protocols.

TECHNICAL TESTS

HOW IT WORKS

CLEANER PRO is a mild cleaner formulated with surfactants and broad-spectrum cleaning agents. The chelating agents it contains trap the limescale dissolved in water and prevent it from depositing on the floor. Does not contain substances that form **residues over time**. **Low-foam and easy-to-rinse formula**.

The Ross-Miles method is used to measure the foaming power of cleaners. The test was conducted by comparing **CLEANER PRO** to a cleaner with persistent foam that tends to leave residues and streaks. The results in the graph show a rapid decrease in foam for **CLEANER PRO**, a characteristic that makes it unlikely for streaks to form.

ENVIRONMENTAL IMPACT

Contains ingredients that are biodegradable up to 98% in accordance with Regulation (EC) No. 648/2004

Free of ammonia, sodium hydroxide, EDTA, phosphates

Concentrated formula

Effective with water at low temperatures

Contains EPA-compliant surfactants

CLEANER PRO

PROFESSIONAL MAINTENANCE FOR SURFACES

TECHNICAL FEATURES

COMPOSITION	A concentrated cleaner formulated with anionic and non-ionic surfactants and cleaning agents
APPEARANCE	Pale yellow
ODOUR	Lemon fragrance
DENSITY	1.010 kg/l
pH	10.1
STORAGE TEMPERATURE	From 5°C to 30°C
APPLICATION TEMPERATURE	From 5°C to 30°C
VOC (Volatile Organic Compounds) (Directive 1999/13/EC)	0.04 g/litre

COVERAGE AND DILUTION (1 litre):

MAINTENANCE 1:200	1.500 m²
Initial stone wash 1:30	50 m²

Coverage rates are indicative.

Packaging

1 litre: boxes of 12.

5 litres: boxes of 4

Available on request

100-litre drums

1,000-litre cubes

SAFETY TIPS

Keep out of reach of children. Do not disperse into the environment after use. The product is classified as dangerous under Regulation 1272/2008 (CLP) and subsequent amendments and supplements.

For safety-related information, please refer to the safety information sheet available on the website www.filasolutions.com and carefully read the product's label.

The recommended instructions and application procedures for our products are the result of accurate tests carried out in our laboratory. There are, however, certain factors that we cannot predict: the condition of the surface before the treatment, particularly rare or unspecified properties/finishes of the material, environmental conditions, and the professionalism of the user. This is why we recommend carrying out a preliminary test on the surface to be treated. FILA always guarantees the quality of its products, but it cannot assume any responsibility in the event of incorrect use.
